	Examiner Vicky A. Johnson	Art Unit 3682	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4 it is unclear how the first and second pivots are coaxial.

Claims 5, 6, 8-14, 16, 19-23 are indefinite because it is unclear which plane is being referred to by the limitation "the plane at the center of rotation of the pulley (or pivot bearing)". There are an infinite number of planes at the center of rotation of the pulley, such as a horizontal plane and a vertical plane. For this office action a vertical plane will be used as the plane at the center of rotation of the pulley or pivot bearing

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Wanie (US 6,398,681).

Wanie discloses a tensioner having a first pulley (50) adapted to communicate with a surface of a power transmission belt, an arm (60) supporting said pulley upon

Art Unit: 3682

which said pulley is rotatably mounted via a pulley bearing (see Fig 2), a second pulley (52) adapted to communicate with a surface of said power transmission belt, a second arm (62) supporting said second pulley upon which said second pulley is rotatably mounted via a second pulley bearing (see Fig 2), the improvement comprising: a strut (58), a first attachment point for said strut (84), a second attachment point for said strut (92), said strut attached to said first and second attachment points (see Fig 2), said first arm rotatably supported at a first pivot (see Fig 2), said second arm rotatably supported at a second pivot (see Fig 2), and said first pulley and said first attachment point each being laterally offset in relation to said first pivot and substantially balanced in terms of parasitic torque across said first pivot (see Fig 2), first and second pivots are radially spaced (see Fig 2).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6,039,664 Schmid (tensioner).
